EDUCATION

B.Tech — Computer Science Engineering (AI/ML)

2025 — 2029

Noida International University, Greater Noida, Uttar Pradesh

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS

Frameworks: React 18, Node.js, Express.js, Vite

AI / APIs: OpenAI GPT-4o, RapidAPI, Murf TTS API, REST APIs

Tools: Git, GitHub, VS Code, Zustand

PROJECTS

VoiceCart — Voice-First Shopping Assistant

2025

React 18, Node.js, Express, OpenAI GPT-4o, RapidAPI, Murf TTS

- Built a full-stack voice-first shopping assistant for visually impaired users where the entire shopping experience works through voice alone with no screen interaction required
- Integrated OpenAI GPT-4o to understand natural language voice commands and extract structured intents like search, add to cart, compare, checkout, and help
- Connected RapidAPI Real-Time Amazon Data to fetch live product results from Amazon India with a mock dataset as fallback
- Implemented wake phrase detection, silence detection, microphone muting during TTS playback, and continuous background listening
- Built with full accessibility support including ARIA labels, keyboard navigation, high contrast support, and screen reader compatibility

Government Schemes Multilingual Assistant

2025

OpenAI APIs, Multilingual NLP, Python, Web Development

- Built an AI-powered web application that makes Indian government schemes accessible to citizens in any regional language
- Used OpenAI APIs to translate and explain complex government scheme information in the user's native regional language
- Addressed a real accessibility problem — millions of eligible citizens cannot access government schemes due to language barriers
- Built and submitted as part of the OpenAI Buildathon — received official certificate of completion. [View Certificate](#)

MalariaGEN — Open Source Contribution (PR #1112)

2026

Git, GitHub, Markdown, malariagen-data-python

- Contributed to MalariaGEN's malariagen-data-python open source repository used by malaria researchers across 30 countries
- Identified a missing Windows setup guide and created WINDOWS_SETUP.md based on personal setup experience
- Updated README.md following review feedback from mentor Jon Brenas. [View PR #1112](#)

HACKATHONS & CERTIFICATIONS

OpenAI Buildathon — Certificate of Completion

2025

Issued by OpenAI | Noida International University

Built Government Schemes Multilingual Assistant — an AI tool making Indian government welfare schemes accessible in regional languages using OpenAI APIs

Certificate: [Click here to view](#)

RELEVANT COURSEWORK

- Python for Artificial Intelligence

ABOUT ME

First year B.Tech student specialising in AI/ML with a strong interest in building tools that solve real problems for real people. I have built two AI-powered applications using OpenAI APIs, contributed to a global open source project, and am currently applying for GSoC 2026 with MalariaGEN to build a natural language interface for malaria vector genomic data. I learn best by building things — every project I have worked on started with identifying a gap and figuring out how to fill it.
